Job Description SAP Consultant Business Intelligence – Analytics – Reporting
As SAP Consultant (Business Intelligence – Analytics – Reporting) you will take a part in the development of global business solutions based on functional and technical requirements.

Your tasks:

- You provide 1st level application support for SAP Business Intelligence, Analytics and Reporting solutions used across the companies of the KURZ Group
- You are responsible for the processing, analysis and coordination of incidents, bugs and service requests within our ticketing system (OTRS)
- You prepare open issues and incidents for discussion and present relevant topics during regular daily support meetings with the responsible stakeholders
- You act as an interface between business users, the different departments and the global KURZ IT organization
- You prepare user documentation and training materials for users

Your profile:

- You have good knowledge and experience in Business Intelligence (preferably SAP BW/BO or comparable software) with several years of professional experience
- You have a good understanding of creating ETL processes from different source-systems (preferably SAP ERP, SAP CRM, SAP ME and Hana Database, or equivalent software)
- You have extensive experience in working with Analysis for Office and in creating queries using the relevant tools (Eclipse or SAP Hana Studio)
- You have experience with user and authorization management
- You have a high customer orientation as well as IT affinity
- You have a very good command of written and spoken English and you are willing to work with an international team
- You are a team player and have good communication skills
- You have an independent, analytical and conceptual way of working
- You are able to design, customize and maintain complex solutions meeting the requirements

Your qualifications:

- Degree in computer science, Business Informatics, Engineering, Economics with an IT focus, or a comparable qualification
- 3+ years of professional experience in Business Intelligence (SAP or comparable software), Analytics, and Requirement Engineering
- Experience in the manufacturing Industry and its processes
